1. The test contains 100 total questions.
2. Each question has 4 options out of which only one is correct.
3. You have to finish the test in 60 minutes.
4. You will be awarded 1 mark for each correct answer and there is no negative marking.
5. The clock will be set at the server. The countdown timer at the top right corner of screen will display the remaining time available for you to complete the examination. When the timer reaches Zero, the examination will end by itself. You need not terminate the examination or submit your paper.
6. The Question Palette displayed on the right side of screen will show the status of each question using one of the following symbols:

You have not visited the question yet.

You have not answered the question.

You have answered the question.

You have NOT answered the question, but have marked the question for review.

You have answered the question, but marked it for review.

The **Mark For Review** status for a question simply indicates that you would like to look at that question again. If a question is answered, but marked for review, then the answer will be considered for evaluation unless the status is modified by the candidate.

7. **Navigating to a Question:** To answer a question, do the following:
   a) Click on the question number in the Question Palette at the right of your screen to go to that numbered question directly. Note that using this option does NOT save your answer to the current question.
   b) Click on **Save & Next** to save your answer for the current question and then go to the next question.
   c) Click on **Mark for Review & Next** to save your answer for the current question and also mark it for review, and then go to the next question.

Note that your answer for the current question will not be saved, if you navigate to another question directly by clicking on a question number without saving the answer to the previous question.

You can view all the questions by clicking on the **Question Paper** button. This feature is provided, so that if you want you can just see the entire question paper at a glance.
